EDUCATION

Devmountain

Graduated October 2020

- Web Development Program

Northern Arizona University, Flagstaff, AZ

Graduated December 2017

- Business Administration

SKILLS

Javascript | React | Redux | NodeJs | Express | PostgreSQL | Massive | Bcrypt | Styled Components | SASS | CSS | HTML5 | Git | Github | Bootstrap | Postman | SQL Tabs | Heroku | Prettier | Material UI | Axios

PROFESSIONAL EXPERIENCE

Devmountain | Remote

July 2020 - October 2020

Web Developer / Software Engineer (student)

Zeppi App - [Github Repo](#) | [Demo](#)

React | Geolocation API | Leaflet | Express | Cube/Earthdistance PostgreSQL | Redux | NodeJS | CSS | SASS

- Designed a treasure hunt marketing web application with integrated messaging, maps, and geolocation for a fresh and interactive business and user experience
- Enabled Users to send(drop) or receive(loot) messages which can be claimed on a map:
 - Geolocation API was used to track device location
 - Cube/Earthdistance PostgreSQL extensions used to create a radius and help match a location
- Developed components with *React* for core functionalities and reusability
- Implemented Leaflet for data visualization on a map and utilized component styling with CSS and SASS
- Provided authentication and user credentials using Bcrypt for a secure user login
- Collaborated with 2 remote developers using Github and Trello in a remote environment

The Bootcamp Journal App - [Github Repo](#)

React | Redux | NodeJS | RESTful API | Express | Bcrypt | PostgreSQL | React-Calendar | MomentJS | Material UI

- Developed an easy to use Goal Oriented Journal App using *React* for core functionalities and reusability
- Used *Redux* and *Redux-Promise Middleware* for container structure
- Integrated *RESTful API* with *Node* for route organization, error handling, create, access, query, and editing multiple relational *MySQL* and *PostgreSQL* databases
- Provided authentication and user credentials using *Express Session* and *Bcrypt* allowing users to register/sign-in and enter main objective, micro-goals
- Created a calendar component using *React- Calendar* library and *MomentJS* to display to-dos and notes that are rendered by a click event
- Utilized lifecycles methods *componentDidMount* and *componentDidUpdate* to fetch data in *React*
- Integrated component styling using *CSS*, *SASS*, and *Material UI*

My BookStore App - [Github Repo](#)

React | NodeJS | RESTful API | JSON | ComponentDidMount | CSS

- Developed an e-commerce site with no database using *React* for core functionalities and reusability
- Developed *RESTful API* with *NodeJS* for route organization, error handling and to create, access, query & edit data from a *JSON* file
- Use lifecycles methods such as *componentDidMount* to fetch data in *React*
- Integrated styling using *CSS*

Navy Federal Credit Union | Yuma, AZ
